THE **NEW FOUNDATION** FOR FUTURE GROWTH

Instruments from Kohler stand for innovation, quality and precision – the values expressed by the company's new offices. This investment is the family business's response to the successful course of the past 30 years and sets the foundation for economic production, efficient working practices and high performance merchandise management. In excess of 4,000 instruments and countless OEM products for well-known manufacturers in the dental industry are developed, produced and adapted to people's different anatomies at the site in Germany and supplied to over 80 countries worldwide.

WITH NEW CAPACITIES FOR DEVELOPMENT AND PRODUCTION

Optimised production processes come together with larger production areas to create the necessary space to expand the varied product range further. More than 100 new instruments are added to the product range each year. Each one meets the most stringent requirements in terms of function, design and hygiene.

Carefully selected materials and quality steels guarantee a high degree of durability and operational reliability. Our strength lies in being able to design and produce complex instruments. We remain discreetly in the background with individual solutions for OEM customers. Each new development includes the experience of internationally recognised implantologists. The result is solutions, such as ground-breaking, patented surfaces that combine safe handling with the highest hygiene standards.

Training

WELCOME TO ONE OF GERMANY'S MOST BEAUTIFUL AREAS

The new seminar centre is equipped with the latest presentation technology. Everything is set up for knowledge transfer, an exchange experience and meetings. Current developments in the field of instruments are presented in product training sessions. User training is carried out by internationally recognised experts, communicates the current theory and practice for the latest operation techniques.

We are happy to put together a supporting programme tailored to personal requirements for seminar guests from home and abroad. Lake Constance, with its unique choice of leisure activities, as it were, on our doorstep.

The training area for up to 120 people
