REF # 8402 – Large

REF # 8403 – Small

(China + Taiwan Patent No. M535068 and 107202064)

W-Tissue Comb is a set of instruments designed for achieving flap tension releasing in a predictable and atraumatic way which makes easier for every clinicians to accomplish this most challenging task. This is not only important in the soft tissue grafts but also plays key role for success in horizontal and vertical bone augmentation surrounding dental implants.
